# Adobe MUSE Introduction

*Adobe Muse enables designers to create HTML websites for desktop and mobile devices, without writing code. Design web-standard sites, like you design print layouts. Use familiar features, hundreds of web fonts, and built-in tools to add interactivity. Then, publish with the Adobe Business Catalyst® service and redeem site hosting support, or publish with any hosting provider.*

## Course Description

Adobe Muse is targeted at visual/graphic designers who are probably already familiar with the Adobe Creative Suite of products and who wish to be able to produce a credible website in a relatively short space of time, without the need for coding. Learning how Adobe Muse simplifies the web Design and Build process by enabling rapid wire framing of web sites whilst incorporating simultaneous WSWIG web sites that are fully HTML5 and CSS Compatible. Build engaging interactivity with built-in and JQuery enabled functionality with little or no code knowledge.

This courses is run on a bespoke basis, giving you the opportunity to tailor the course to your exact requirements. To provide a starting point, we'd recommend you use the suggested course outline as a guide.

Should you wish to further develop your knowledge, you might be interested in our other Web Design Courses.

The course runs from 9.30 am to approximately 4.30 pm.

**An Introduction to Muse**
Why use Muse?
