InDesign for Presentations

dynamix training

Course Description

The latest update to Adobe InDesign makes creating highly-designed, graphically-rich and powerful presentations easy and compelling. If you know how to use InDesign for print projects, you now have a simple path to creating interactive and powerful presentations as an alternative to PowerPoint, your presentations can be viewed on tablets, laptops, mobiles and desktop computers and can be uploaded to the web directly from InDesign or exported to PDF format or ePub formats, InDesign itself has its very own presentation "screen mode" as well.

If you need to make "Media Rich', "high production value" presentations, than this is a valid and direct route.

Please note, that a prerequisite of the course is that you can already use InDesign.

The course runs from 9.30 am to approximately 4.30 pm.
Duration: 1 day.

Introduction
Overview and understanding of technologies
Planning an interactive presentation for use on multiple devices

Adding Multimedia
Video
Animation
Slide shows
Buttons
Hyperlinks
.OAM

Setting metadata
Exporting epubs
